We offer businesses the opportunity to create a beautiful end product with their own graphics and branding, or use one of our Freshly Prepared standard designs. Our paperboard can be printed with up to 6 colors and with a minimum order of only 25,000 pieces! Give your product line a "face lift" with these exceptional lightweight sturdy paperboard containers. Not only will they present your product with the optimum eye appeal, but they are also biodegradable and environmentally friendly!

- Stock designs available for immediate delivery
- Beautiful graphics and superior shelf impact
- Biodegradable and environmentally friendly
- Custom sizes, shapes and graphics available
- 6 color printing capability

Custom Designs

Note: L W D dimensions are represented in inches.

Equipment

The Grab-n-Go Green Meal Packaging System is your start-to-finish packaging solution. Whatever your meal production needs, Grab-n-Go Green has a machine that will dramatically improve the meal assembly process. Manual tabletop models are available in addition to the fully automatic machines.

MANUAL HEAT SEAL MACHINES – HM50-RF AND AL400

Earn big profits with minimal investment. Our compact, versatile and portable HM50-RF and AL400 are a cost effective alternative to hand wrapping. These machines quickly and easily seal a variety of trays, simply by inserting different tray holders. They are ideal for any size operation. Quick and easy, these machines seal food in the container and are ideal for on-site preparation operations. Simply insert different tray holders to accommodate a variety of containers.

- Provides a tamper evident seal
- Durable, versatile and easy to use
- Space savings design
- Energy efficient

AL400

The design of the AL400 with its cantilevered handle allows for quick, efficient and effortless sealing. This flexible unit seals the entire range of nine (9) heat seal trays with the use of additional tray holders. Some tray holders are available in 2 or 4-up configurations.

HM50-RF

The design of the HM50-RF with its cantilevered handle allows for quick, efficient and effortless sealing. This flexible unit seals seven (7) heat seal trays with the use of additional tray holders.

SEMI-AUTOMATIC HEAT SEAL MACHINE – GNGG100

The GNGG100 countertop sealing machine is quick and simple to use. It seals over 9 different trays and provides a tamper evident seal. Create consistent portions during a production run of up to 24 trays per minute. Heat sealing will create extended shelf life and increase sales. The GNGG100 is easy to use and its footprint can fit in any production facility.

AUTOMATIC HEAT SEAL MACHINE – FP-2000

The FP-2000 sealing machine is specifically designed for high volume sandwich production. This efficient sealer and conveyor is simple to load and unload. The adjustable base tooling is easily removable for quick change over from one size to another, and for wash down. This means operators can be in production within minutes. The FP-2000 can be permanently placed or easily wheeled where needed in your production facility.
