# OVENABLE TRAYS

## DUAL OVENABLE (400°F) RECYCLABLE PLASTIC TRAYS

Form Plastics ovenable/microwaveable trays are recyclable.

Available in portion control and entrée sizes, these trays are excellent choices for use in conventional, institutional, retherm and microwave ovens, and are refrigerator and freezer safe.

Our high temperature 400°F dual ovenable disposable plastic trays will keep your school feeding system up to date with current trends.

- Ovenable, refrigerator and freezer safe
- Bake in the tray:
  - Add batter or dough and seal the tray
  - Bake right in the tray at the site or central kitchen
  - Serve hot and fresh
  - Smells and looks great
- Recyclable
- Trays fit nicely into wire baskets, bags, coolers or boxes
- Appetizing meal appearance increases participation
- Increased labor efficiency during production and at serving sites
- Airtight/watertight/tamper-evident seal:
  - Completely seals between compartments
  - Prevents compartment spillovers
  - Flavors are sealed within each compartment
  - Keeps meal fresher longer
- Trays designed to:
  - Hold required portions
  - Create consistent portion sizes
  - Promote food cost savings through portion control
- Different tray styles allow for meal flexibility and menu planning

Our ovenable trays complement the Form Plastics extensive line of trays, film and sealing equipment for K-12 school feeding programs.

# SEALING EQUIPMENT

## AL400 MANUAL HEAT SEAL LIDDING MACHINE

**SEALS UP TO 720 TRAYS PER HOUR!**

Quick and easy to use, the compact, versatile and portable AL400 heat seal countertop machine is at home anywhere in your kitchen. Its small footprint and simple design lets you package your food in no time. The AL400 is capable of sealing hundreds of different plastic and paperboard tray styles.

## HCM100 MANUAL HEAT SEAL LIDDING MACHINE

**SEALS UP TO 2160 TRAYS PER HOUR!**

The HCM100 Manual heat seal lidding machine affords the operator the flexibility to lid a wide variety of rigid trays. With its interchangeable sealing plate process, this tabletop machine allows users to lid hundreds of different tray styles. The changeover between tray sizes is fast and easy, making the HCM100 a very versatile and labor efficient heat seal lidding option.

## HCSA100 SEMI-AUTOMATIC HEAT SEAL LIDDING MACHINE

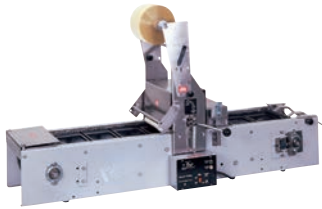

**SEALS UP TO 2160 TRAYS PER HOUR!**

The HCSA100 Semi-Automatic heat seal lidding machine affords the operator the flexibility to lid a wide variety of rigid trays. With its interchangeable sealing plate process, this tabletop machine allows users to lid hundreds of different tray styles. The changeover between tray sizes is fast and easy, making the HCSA100 a very versatile and labor efficient heat seal lidding option.

### MINIMATIC III AUTOMATIC HEAT SEAL LIDDING MACHINE

**SEALS UP TO 1500 TRAYS PER HOUR!**

The MiniMatic III Automatic heat seal lidding machine is designed for intermediate volume packaging by vendors, schools, food processors, hospitals, in-plant feeders, etc. This tabletop automatic machine, with preset temperature and constant speed, requires only one operator. Production output of up to 25 packages per minute will increase product flow, decrease labor and provide a tamper-evident seal.

### AL300X AUTOMATIC HEAT SEAL LIDDING MACHINE

**SEALS UP TO 1800 TRAYS PER HOUR!**

The AL300X Automatic heat seal lidding machine is a cost-effective alternative to rigid plastic lids or overwrapping. It utilizes an interchangeable pocket process and an adjustable speed control, which allows greater flexibility to set the pace of your production. A second heat source increases packaging output by operating the AL300X at a higher speed while improving the film-to-container seal.

### HHA600 AUTOMATIC HEAT SEAL LIDDING MACHINE

**SEALS UP TO 7200 TRAYS PER HOUR!**

The HHA600 Automatic heat seal lidding machine is the most durable, versatile, safe and efficient food packaging machine in the industry, sealing at speeds up to 7200 trays per hour. It is engineered to include the most complete set of safety features available. The length of the machine can be customized (in 4' increments) to fit your production requirements.

# LIDDING, OVERWRAP, SPECIALTY FILMS

As a master distributor for DuPont Teijin Mylar® films, Form Plastics has the ability to offer the specific solution that is right for you for ovenable and non-ovenable films. Form Plastics converts and slits all film in-house, allowing us to offer various film types, roll widths, lengths, gauges, and core sizes.

## SOLUTIONS FOR OVENABLE & NON-OVENABLE FILMS

We can manufacture and convert any of our films to meet your precise specifications. Also, if you happen to require a film that is not referenced below, please contact Form Plastics for availability.

- Overwrap films for vertical (VFFS) and horizontal (HFFS) form fill and seal machines
  - Ovenable overwrap film (OWF Series)
  - Non-ovenable overwrap film
  - Polypropylene overwrap film (PP, OPP, BOPP)
- Custom printed films
  - Incorporate logos, company colors, messages
  - Available in a variety of film materials (perforated/vented and non-perforated) and gauges
- Other Specialty Films
  - Cellophane Films
  - Shrink Films
- All custom films are available with any of the following
  - Corona Treated
  - Barrier Treated
  - Clearview Treated (Anti-fog)
  - Custom Printed
